📍 Dien Ban Tay - TP DaNang

💎 MaiQuangPhuoc

SUMMARY

AI student with a passion for developing systems that contribute to education and agriculture. I possess strong systems-thinking skills, a proactive work ethic, and a willingness to continuously learn and adapt to new technologies. With a solid foundation in IT and three years of study in AI I am seeking an internship opportunity to gain practical experience through real-world projects while creating value for both the company and myself

EDUCATION

Vietnam - Korea University of Information and Communication Technology (VKU) 2022 - 2027 (Expected)
Engineering Student in Data Science and Artificial Intelligence GPA: 3.4/ 4.00

WORK EXPERIENCE

Home Mau Thuy Lien | TP Da Nang | 7/2024 - 10/2024

- Complete the home appliance business website with basic functions for users and admins
- Solve business problems, expand markets, expand AI features about ABSA

Institute of Digital Science and Technology (eSTI) | TP Da Nang (VKU) | 6/2025 - 10/2025

- Agentic AI Bootcamp in education aims to support teachers and students with AI Agent field
- Multi Agent system with functions: question answer, create/edit study plans, lesson plans

PROJECT

SmartEdu AI: Personalized Learning and Planning Assistant 6/2025 - 11/2025

- Multi-agent chatbot system for personalized self-learning and addressing stereotype issues
- Personalized for high school students to reduce information illusion, cost-effective and user-friendly
- Features document Q&A, personalized study plans, and test generation from user information
- Each function will have many AI Agents with many tools and processes divided into different parts
- LangGraph, RAG , Groq API, Qdrant Store , MongoDB , Python, FastAPI, ReactJS, Tailwind CSS

Multi-Agent Rice Disease Diagnosis and Advisory System 01/2026 - 5/2026

- Smart agricultural assistant for farming, combining AI Agents, chatbot interaction, Computer Vision
- Built a multi-agent system for agricultural consultation, field management planning, and preventive risk assessment
- Developed a three-stage Computer Vision architecture that enhances prediction accuracy through multiple advanced models deployed in sequential pipelines
- ReactJS, Tailwind CSS , TypeScript, LangGraph, RAG , DeepSeek API, Qdrant Store , Python, Fast API

TECHNICAL SKILLS & KNOWLEDGE

Programming Language	Python, Java, C\C++ , SQL , ReactJS
Frameworks	PyTorch, TensorFlow, Keras, LangChain, LangGraph
AI & Machine Learning	Deep learning, Computer Vision, NLP, AI Agents, Reinforcement Learning
